Tech-savvy Luxury Hotels:

Elevating Your Stay With Smart Automation

Smart Metering

Controlling electrical services based on guest availability and app management enhances the hotel's environmental sustainability through optimized energy use.

Indoor & Outdoor Panels

Guest rooms can be equipped with indoor and outdoor units with Smart Hotel Solution. These modules are exquisite and stylish. There are various services available to guests, including "Do Not Disturb", "Make My Room", bell and laundry service.

Launch ambiance & comfort scenes

The hotel ambiance is crucial for a memorable guest experience, requiring customization of scenes like Welcome, Romantic, Sleep, Movie, and Music to create a unique and inviting atmosphere.

Smart Room Controls

Guests can control various aspects of their hotel room, such as lighting, temperature, and entertainment systems. Also personalize their room settings, such as lighting and temperature, to suit their preferences.

Smart Access Control

Card Access Systems & Door Locks
Access to spaces is controlled through card credentials, readers, and locks, with security card readers validating key data and smart locks, surveillance, and access control bolstering hotel security.

Guest Room Availability

The keycard can be identified to determine if a guest is present, and a customized corridor panel can be used to display special lighting to indicate a guest is inside.

Personalised solutions

Nexgen smart hotel solution offers a fully customized experience, enabling to raise standards and improve the guest experience in order to receive the best reviews from hotel patrons. These would increase the hotels' value and demand.

Elegant Touch Panels

Mix & Match Colors

Customize the color options for tempered glass and frames to perfectly match your interior.

Custom icons

Icons on touch switches can be fully customized to match your specific needs and preferences.

Customized Corridor Panels

Personalise the front panel by selecting the hotel logo, room number, and service indicators. Additionally, pick a custom design from a variety of colors and shapes to complement the hotel's theme.

Retrofit design

- No re-wiring required, just swap the wires to smart switch and done.
- Comes with 2, 4, 6 modular sizes to fit standard metal boxes.
- A wide array of modules allows for over 60 unique combinations, resulting in unparalleled flexibility.
- Reliable hardware with a maximum load capacity upto 32Amps.
- Reduce costs related to wiring and eliminate the need for intricate wiring.
